## About This Game

In this short 2.5D arcade/action game, control a giant mutant lizard to eat people, crush cars, and throw things. Spend points on upgrades and new abilities and try to survive an increasingly deadly hail of bullets.

### Features

- Three Game modes:
  - Story Mode - Play as the lizard and rampage your way through three main levels and two bosses with a few cutscenes along the way. Unlock two other monsters for arcade mode.
  - Arcade Mode - Choose from three monsters and try to survive as long as you can. No bosses. No cutscenes.
  - Practice Mode - Relax and practice your moves without getting shot at. Get a feel for the controls and throw stuff at targets.
- Three Unique Monsters:
  - The first creature uses its tail to grab and throw anything it can lift. The two unlockable ones each have their own way of tossing things.
  - Each one has its own practice level, tailored to the monster's abilities.

- 
- Each monster has over two dozen animations, plus an IK system to move the character's neck and head (so the monster can look at the annoying jerk who keep shooting it).
  - Upgrades:  
Spend the points that you get from eating people to improve stats like health and armor, and unlock the ability to pick up cars and stomp on things.

Disclaimer: I have no interest in online multiplayer. So here we go.

Pros:

- + Great for those who like old school beat em ups/gaming history
- + Collection of games is genuinely solid
- + Production values and optimization holds up
- + Games are easy to pick up and play, but still cathartic and fun
- + Armored Warriors and Battle Circuit are worth it alone (And my personal favorites out of the seven)

Neutral:

No Licensed Beat Em Ups such Aliens vs. Predator

Cons:

- Online Lag can happen depending on your connection
- Could use some more extras with concept art and the like

If this looks even remotely interesting to you, you will enjoy it. Has issues, but it does more right than wrong. The Capcom Beat Em' Up Bundle is a fun time.. I have played a lot of vr games over the past year but nothing made me feel quite so ill so quickly as this. Maybe because everything was at the wrong scale, or perhaps the aliasing which i couldn't improve (supersampling didn't seem to work). Anyway i couldnt get to the end of this short experience so requested a refund. If you are really immune to vr sickness you may well like this otherwise i wouldn't bother.. Really really bad port job and an uninspiring gameplay.. idk never gave it a try, just the left the game on to grind cards, looks bad but never played this♥♥♥♥♥♥br>. Great mindless fun... most especially for the Adventure Time fan!

Playing this on the keyboard truly sucks. Investing in a controller (or plug one of the more recent gen console controllers) made this game a lot more fun.

This game is MATHEMATIC, yo!. Megalopolis is the 5th tiny stuff DLC and this time it allows content from Modern Times expansion pack into mission. The only tiny DLC that does it, if I remember correctly.

The missions seemed to be fun. You are given points for every working person with home, which means that you will have to deal with mass immigration or you can also get more points by "bribe" (costs money) or doing small side-quests, all under time pressure. At first I thought that it will be a better version of Dry Cement DLC mission, making you build a huge city. As you can expect, my attempt at beating this mission that way failed and I just decided to build your usual strong economy and then just bribe your way to victory.

So nope, still not going to challenge you in a new way.

As for new building, it's Conventillo. A house made of garbage stuff, that was painted to make it look awesome. It has as many slots as Tementents, but it starts with awesome 80+ service quality and then slowly lowers down to be just a bit worse than Tementents. You can repay full price to fix it back. Sadly it costs more than Tenements or Apartment and USSR Development Aid edict doesn't cut down price of this DLC building, making it less of a good choice.. We are born of the crab, made men by the crab, undone by the crab.

our claws are yet to open. Fear the old crab.. I don't really want to be derisive about this game, it isn't horrible or anything, however I found it to be super repetitive.

Personally I was hoping for a DND like adventure and this wasn't anything of the sort. The Idea of unlocking different sets of die isn't nearly as nice as different weapons & items to modify stats. There are stat modifiers in the game but they are very bland. You can find or purchase +1 modifiers, and a few other mechanics but it's a shallow pool. The different classes of characters have to be unlocked from playing and they don't really give you a diverse experience of play. Each class does have their own set of abilities, but it was shocking to me how little difference it made to the game. I guess in that lane of reasoning it doesn't have the depth of a traditional DND type game, which is what the name "paper dungeon" conjures to mind.

To me it seems that a game like this is supposed to appeal to your imagination in lieu of awesome graphics or gameplay, this didn't do that for me. YMMV but I wouldn't recommend it.

I'm depressed... The atmosphere in Fall of Light is really strong and when they hit this girl, oh! It breaks my hearth.. I mean heart. Seriously the game is pretty decent, but simplified DS clone. Play top difficulty if you're a veteran, then it's pretty cool. . This is a good game, I liked Kyler's character and the whole feel and setting of this game. The graphics were good and I really enjoyed the ending scenes. A lot of people have problems with the last puzzle but it just has some very picky and sensitive mechanics so take your time and save often. There were some bad puzzles (constellation/season stones, and the rollback drawer code), and some good ones (dollhouse, sheep, darts, seating chart). I thought it was a little crazy that Nancy would get a jetpack but it was actually tied in well. In the end I felt that Nancy didn't need to launch the rocket when she had the jetpack but sure, why not? I couldn't think of any loose ends other than where is Nancy's car keys?. Great strategy game. Feels like a direct port from the mobile edition, but I will need to try multiplayer before I can tell for sure.. Great idea for a game. The art is wonderful, and the story is decent. However, the combat system is quite terrible, and very boring.. One of the best transport simulators I've ever played!
